September 15th, 1970.

Dear Sir,

Over the past years I have purchased and sold Lotus Elite cars and parts. I am now interested with the idea of forming an Elite Register which would include the addresses of all the Elite Owners in the U.S. as well as chassis numbers and engine numbers of the cars, and a brief history if available. This register would be available when completed to anybody who is interested. I have had fourteen Elites and quite a few of my customers are interested in forming an Elite Club, and this may come about later on.

I am writing to about 100 people who have had Elites in the past, and to the best of my knowledge still own them. Some of these people may have sold their cars but may still be interested in a Club or Register, and if so a reply would be appreciated.

As I have been interested in Elites for some time, I have been able to build up a stock of parts and I have a parts list available for all engine parts as well as other components.

I look forward to receiving a reply.

Sincerely,

William S. Hutton
